Languages

C#, Javascript, HTML, LINQ, HTML, CSS, SQL

Frameworks / Tools

Git from command line, Visual Studio, ASP .NET, MVC, Pivotal Tracker (Epics/User Stories), Azure, SQL Server

Personal Statement

I am a person who stutters. I have stuttered for my entire life and have worked extremely hard to get where I am at today. Through all of the hard times stuttering has brought on me, I have learned a lot about my ability to persevere and keep attacking hard situations consistently. I am currently working on my speech frequently. I see a speech pathologist 3 times a week and have made some great improvements over the past year. Conversations are still hard situations for me, so interviews can be incredibly stressful for me. I ask that you don't try to finish my sentences and be patient. Stuttering doesn't define who I am, but it has made me the person that I am today. It has made me patient and understanding with every single person that I meet and talk to.

If you want any addition information, or just want to learn about stuttering, you can visit https://westutter.org/
